

# Avery Dennison® Facade Film

## Transforming buildings

**Avery Dennison® Facade Film transforms buildings, ensuring fast, clean and easy redecoration across a vast range of residential and commercial projects. You can create a truly professional finish overnight, with minimum disruption to building owners, users and neighbours.**

Designed for the demands of outdoor applications, with exposure to the elements, Facade Film offers durability of up to 10 years and conformability in one single layer - contouring smoothly around curved and irregular surfaces. With high adhesion on difficult building substrates such as plastics, aluminium, uncoated/coated steel and reinforced facade panels, it offers an excellent alternative to traditional paint solutions.

Avery Dennison has been providing premium materials for building facades and door/window frames for more than 15 years. We can support projects in and around Europe, including custom project warranties for customers and end-users.

### EXTENDED OPTIONS

- 100 micron single-layer cast film with Easy Apply™ technology for faster and more convenient applications of large substrates
- 20cm wide finished rolls, for simple application on door and window frames
- Best in class colour matching service, starting at a minimum order quantity of 100 linear meter
- All corporate identity colours available in a Gloss, Lustre (Satin) or Matt finish

**FEATURES**

- 50-micron and 100-micron single-layer face film construction
- Excellent conformability
- Up to 10 years warranted durability
- Permanent adhesion - no primer required
- Fire classification to European standards
- Custom colour match available, from 100 linear meters MOQ
- Narrow (0.20 m) and wide (1.23 m) widths available
- Easy Apply Technology

**BENEFITS**

- Conforms to curved & irregular surfaces, for a smooth paint-like finish
- Fast, clean application with minimal disruption and downtime
- Easy Apply technology for even faster application on large surfaces
- Continues to look good for up to 10 years
- Unique custom/branded colours & finishes for building owners
- Efficient use of material, using pre-cut 20 cm width

**APPLICATION AREAS**

- Restyling, refurbishing, branding or decorating commercial, retail and residential buildings
- Designed for exterior building facades, window frames, walls, door frames & panels

**100-micron single-layer film with Easy Apply technology**

Extended options available for Facade Film include a thicker film, which is easier to handle for larger applications. Adding Easy Apply technology increases application speed and convenience for flat and curved surfaces.

**20cm Facade Film for window/door frames**

A narrow 20 cm roll width is also available across all standard colours. This is an efficient width for window and door frame applications, allowing optimal use of material and avoiding waste.
